The Department of Medicine

is pleased to welcome

David E. Cohen, MD, PhD

as

Chief, Division of Gastroenterology and Hepatology
NewYork-Presbyterian/Weill Cornell Medical Center

Vincent Astor Distinguished Professor of Medicine
Weill Cornell Medicine

Dr. David E. Cohen is an internationally renowned physician-scientist with a particular clinical and research focus on obesity-related liver disease.
Dr. David E. Cohen, an expert in obesity-related gastrointestinal disorders, particularly nonalcoholic fatty liver disease, brings extensive clinical, research, and administrative expertise to his role as Chief of the Division of Gastroenterology and Hepatology at Weill Cornell Medicine and NewYork-Presbyterian/Weill Cornell Medical Center. Dr. Cohen oversees a division that has more than doubled in size over the past five years, with a marked increase in clinical volume and subspecialty expertise, including major programs in invasive endoscopy and transplant hepatology. Leading-edge clinical and basic research initiatives are focused on hepatitis C, gastrointestinal cancer, irritable bowel syndrome, and inflammatory bowel disease, to name a few.

Dr. Cohen joins Weill Cornell from Brigham and Women’s Hospital, where he served as Director of Hepatology. He was also the Robert H. Ebert Professor of Medicine at Harvard Medical School and Director of the Harvard-Massachusetts Institute of Technology Division of Health Sciences and Technology. He is the recipient of several grants from the National Institute of Diabetes and Digestive and Kidney Diseases, including a MERIT award for his research on liver diseases.

Dr. Cohen has just assumed the role of Editor-in-Chief of Hepatology, the premier journal in the field published by the American Association for the Study of Liver Diseases.
