

Center to Advance Palliative Care

Our Mission

The **Center to Advance Palliative Care (CAPC)** is a national organization dedicated to increasing the availability of quality palliative care services for people living with serious illness.

Vision for the Future

ALL patients with serious illness will have access to quality palliative care.

- All clinicians will have the knowledge and skill to deliver quality palliative care;
- All health care organizations will have the capacity to provide quality palliative care;
- All patients and families will know what palliative care is and demand it when needed.

You have unlimited access to CAPC courses with free CE Credits

- Build skills & earn free CME/CEU by completing online courses
- Clinical courses for all disciplines and all specialties
- CACP Designation in Pain Management, Symptom Management, and Communication Skills
- Case-based, interactive
- Compatible on computers, tablets and smartphones

More than 175,000 CAPC courses have been taken to date. Almost 45,000 individual user accounts have been created to date.

“Today I finished the last course of the COMPLETE curriculum offered in CAPC Central. This represents over 36 hours of nursing CE. WOW!”

“These courses are rich in practical information, presented in various ways fully using principles of adult education.”

“The resources and downloads are superior to anything I have seen addressing palliative care. Navigating the website is a breeze. I will be incorporating knowledge gained into my practice, as well as using the various resources for staff/patient/family education.”

Thank you!
