

**Residents and Fellows Research Day  
Keynote Speaker 2010**

Profile appears as written in the year of publication.

**Robert M. Glickman, M.D.**  
**“Cholera and Sprue:  
Fortune Favors the Prepared Mind”**

Robert M. Glickman, M.D., the Robert M. and Mary H. Glickman Professor of Medicine and Gastroenterology at the New York University School of Medicine, will be the keynote speaker at the 2010 Residents and Fellows Research Day on May 12. He will discuss how physicians who are both clinicians and investigators have special opportunities to further our fundamental understanding of disease. He will use as examples two diseases of tremendous public health significance, celiac sprue and cholera.

Dr. Glickman earned his A.B. from Amherst College and his M.D. from Harvard Medical School, both with distinction. Following an internship and residency at the Harvard Medical Services of Boston City Hospital, he completed clinical and research fellowships in gastroenterology at Massachusetts General Hospital. He was appointed to the faculty of Harvard Medical School in 1970.

In 1977, Dr. Glickman joined the faculty of Columbia University College of Physicians and Surgeons, where he served as the Samuel Bard Professor of Medicine and chairman of the Department of Medicine from 1982 to 1990.

In 1990, he returned to Boston to become the Herman L. Blumgart Professor of Medicine at Harvard Medical School and physician-in-chief and chairman of the Department of Medicine, Beth Israel

Hospital. In 1996, he was named physician-in-chief and chairman of the Department of Medicine of the newly formed Beth Israel Deaconess Medical Center.

Dr. Glickman was appointed the 14th dean of the New York University School of Medicine in 1998, a position he held until 2007. From 2002 to 2007, he also served as C.E.O. of NYU Hospitals Center.

Dr. Glickman is a highly respected gastroenterologist, having served as chief of the divisions of Gastroenterology at Beth Israel Hospital, Boston, and Columbia Presbyterian Medical Center, New York. He has trained many outstanding gastroenterologists both in Boston and New York, and is the author of more than 75 publications related to the gastrointestinal tract. His specific interests have defined the role of the small intestine in lipid absorption and lipoprotein formation.

Dr. Glickman is active in numerous professional societies with a clinical or research focus, for whom he has served as president and in other leadership positions. He is also a current or past member of several major editorial boards.

In addition, he is a diplomate of the American Board of Internal Medicine, a member of the Institute of Medicine of the National Academy of Science, a fellow of the New York Academy of Medicine, and a master of the American College of Physicians.
