### **Site Utilities to be Moved on Sixth Street**

During the next few months we will need to relocate a fire hydrant from the north to the south side of Sixth Street for the duration of construction. It will be replaced at the original location when the construction is complete but the moved hydrant will remain in place so the street will then have an additional hydrant.

Two light poles will also be relocated to the south side of the street and will be moved back to the north side following the construction.

A water line replacement is also required. This will not require closing the street but the water main will be shut down briefly. The work will take place at night and the shut-down will be limited to Sixth Street between Seventh and Eighth Avenues.

Approvals have been received for all of these changes.

#### **Upcoming Work**

Current construction work hours are Monday through Friday, from 7:00 a.m. until 6:00 p.m. Some equipment deliveries are expected on off hours and notices of early deliveries will continue to be sent in advance, as will notice of any other change in the work hours. We do not anticipate

extended work hours during the next four weeks.

The construction schedule for the next four weeks, **March 16 through April 15**, includes continued excavation and foundation work.

We expect that drilling will be completed during April.
