The Symfora Tapes
Expert Clinical Evaluation of Borderline Personality Disorder

A rare opportunity to view master clinicians at work.

Salman Akhtar  Lorna Smith Benjamin  Arthur Freeman
Marsha Linehan  Lawrence Rockland  Michael Stone  Otto Kernberg

This set of seven DVDs is an excellent teaching aid to demonstrate assessment approaches from different modalities.

Each DVD depicts a complete, unedited initial interview with a man suffering from a severe personality disorder. Leading contemporary clinicians, representing major frames of reference, conduct these interviews utilizing cognitive-behavioral, interpersonal, transference-focused, dialectical behavioral, supportive and integrated psychodynamic psychotherapy. You will see first hand how different schools apply different strategies and techniques in their approach to the same patient.

Distribution of The Symfora Tapes in the U.S. is made possible by:

NewYork–Presbyterian
Borderline Personality Disorder Resource Center
